On this pathway, you'll empower yourself to assess and shift the foundational building blocks of our physical reality.

This is the place and space of *polarity light*, where you heal your past wounds, land in the present, and help create a future through interacting with the most primal of energy principles.

You'll explore how to comprehend energy structures like light and sound; negatively, positively, and neutrally charged wave-particles; and the science and spirituality behind these components.

## **Curriculum Details & Dates for Certification Part 2 - Professional Development**

### **Unit 1: Going for Adept Status – Performing Safe & Powerful Energy Medicine Healings & Readings On Individuals & Groups**

There is a great deal of skill involved in working on others energetically.

Whether you're offering an intuitive assessment or performing a healing, interacting with an individual or a group — your effectiveness and confidence will increase with concepts and techniques that build on what you learned in Part 1 of this Certification Program.

You've laid the groundwork; perhaps you even already have a lot of experience. There is always more to explore to achieve the status of an adept energy medicine healer.

Cyndi will guide you through how to approach a session and how to use all the methods of your intuition, while maintaining boundaries for yourself and others. She'll share the best ways to deal with friction or feelings that might arise within you or others.

Cyndi will also walk you through even deeper matters, such as how to present feedback if you believe the other person will reject it — and how to know when to hold back or not. You'll take into account the matters of spirit, such as figuring out how to assist others (and yourself) if dark entities or forces intrude.

**During Unit 1**, you'll delve into the practical matters, the science, and all things spiritual, so you can confidently soar as a practitioner.

- Discover the Healer’s Code of Ethics — adapted from the American Medical Association pledge and customized for energy work — and further adapt the guidelines to **create your personal energy healer’s oath**
- Explore the **best ways to respond to common challenges** energy healing practitioners can face during a session — from an angry client to sourcing among spirit allies
- **Develop stronger powers and boundaries**, enabling you to constantly evaluate and filter energetic sources
- Find ways to **expand your access and understanding of sources** by applying the ancient Arabic concept of the Imaginal Realms that you learned about in Part 1 of this certification course

## **Unit 2: Magnifying Your Every Move Through Power Pathway Practices**

The Power Pathway is glorious. When attuned to it, you can summon significant forces, qualities, and energies.

Often, issues that won't budge on the elemental or everyday pathways are stuck because of events on the Power Pathway. There are generative and degenerative forces there — huge streams of energy that can either create or destroy.

### **During Unit 2, you'll discover:**

- The **Power Pathway**, a space filled with forces and qualities that can create enormous and swift change
- How to **direct unique forces, virtues, and other spiritual qualities** — either on your own, or with various helpful Power Pathway beings
- The **golden Kundalini**, the complement to the serpent Kundalini on the elemental pathway, which activates the Divine Law of Love and your inner *siddhis*, or supernatural powers. With this kundalini flowing, you can be especially effective with a client
- The **“setting of the seals,” lenses over the chakras** that, when properly established, enable you to steer and direct creative and healing energies at an optimum speed and intensity
- **Forces, virtues, and rays on the Power Pathway** that serve the higher good

- An **array of beings that can help you** to identify the higher needs of your clients
- Various **energy bodies available through the Power Pathway**, such as the gold, platinum, life spirit, and superluminal bodies.
- **Practice in how to help a client** accept the most empowering of the transformative energies — interaction with microbes and the spine/*kanda* through the power-pathway
- A **special form of Kundalini that affects only positive transformation**, providing a vital way of preparing the chakras to be true instruments of vitality

By learning about, and practicing within, this Power Pathway, you create the possibility for significant fast-acting change.

### **Unit 3: Bringing About Healing Through Love on the Divine Pathway**

The Divine Pathway is a state rather than a place. It’s an indwelling and an out-dwelling — the place we all call “home” in our souls.

When you support clients’ healing through the Divine Pathway, you invite their unique and beautiful transformation. This healing can create extraordinarily strong experiences — along this pathway, you can help a client excavate their most painful personal experiences, which requires addressing universal life themes.

The key to accomplishing this is knowing that *you* have the right to petition for help, just as your client does.

To be of service on this pathway, we must first transform our chakras into channels of light. These then turn into wells of divine power when we address each chakra’s related *bowl*, (universal challenge). Our own energetic fields then shift, rendering us far better able to relate to a client and their deepest needs. We can guide the client in their search for everyday enlightenment while we continue to remold them through compassion. It’s at this point that we can best activate the Celestial Wishing Tree, a chakra devoted to the petitioner for self-development and wish-granting.

To align with the Divine Pathway, we first activate our radiant Kundalini. We can then interact with the various angels on this pathway, as can our clients. It’s also important here to achieve the consciousness states of *hyper-gamma*,

*lambda, and epsilon*, using the theta brainwave as an inviting doorway. These are the states that have been scientifically shown to be unique to higher-level gurus, healers, and [what kind of?] masters.

Matters of dark and light hold a different meaning on this pathway, as the spiritual laws are non-judgmental. They allow you — and a client — to create shifts through willingness, alignment with Divine Will, and finding a healthy way to meet a true need.

You can bring about physical changes through the *sushumna*, or spine, or any central/centrum material in the body, including its microbes. You can also employ the powerful *miracle body*.

### **During Unit 3, you'll discover:**

- The empowering **principles of healing through the Divine Pathway** — and radiant Kundalini, the way to relate to them
- The **spiritual laws that enable the healing powers of love and compassion** for all traumatic conditions — including through obtaining *hyper-gamma, lambda, and epsilon* consciousness states, activating the “enlightenment bodies” as a healer, and activating the Keys of Destiny
- Access to the **angelic beings available through the divine pathway** and the advanced use of performing readings and healings through the *miracle body*
- How to **invite a client into physical and psychological change**, such as through the activation of positive neurotransmitters and hormones in the body and the star seed of destiny energetic body
- Ways to **address the “bowls of existence”** (or universal themes of darkness) within a client that underpin all trauma and stress
- Full **activation of the *Celestial Wishing Tree***, a powerful center for manifestation
- **Divine principles for creating change** in your clients' neurology, microbial communities, and connective tissue
- The **transformation of your own chakras and energy fields into pure light** — and the songs of love that enforce their original

signature (and heal the molecular gaps discussed in Unit 1), so you can guide a client through the same process

### **Unit 4: Serving as the Higher Healer**

You've undergone quite the journey, internally and externally. Before you set forth into your next grand adventure, there are a few additional key concepts and techniques that will help cement your position as a truly elevated healer.

First, Cyndi will review with you some basic concepts — including using the intuitive (and *siddhi*) gifts when engaging with a client or group. One byproduct of the Divine Pathway is the merging of these abilities into a state called *numinosity* — in which all becomes clear, and all healing energies are shared instantaneously.

As you practice this ability on others, you'll also delve into employing the power and Divine Pathway concepts of self-creation and divine will, enabling you to assist the client who wants to forge their best possible future.

Cyndi will also share an advanced exploration of a little-known chakra called the Celestial Wishing Tree — and the scientific evidence that supports it.

You'll also integrate your knowledge of all the pathways to learn and practice a very simple way to heal — performing psychic surgery with light and sound. You'll then round out our time together with a rousing exploration of the Planes of Light — levels of learning mainly available to the dead, yet equally critical for the conscious healer. After that, you'll investigate the eleven known dimensions.

You'll complete your sessions with a celebration, from which you'll emerge aware of all the love, wisdom, and power you've embodied during our time together. This will mark the earning of your Certificate.

#### **During Unit 4, you'll discover:**

- The **higher resolution of intuitive gifts, called *numinosity*** — and how to use this capability for receiving data and delivering healing to neutralize the *koshas* — sheaths that cover various aspects of ourselves
- The **science and spirituality of *futuring*** to help your client make best-case decisions
- How to employ the Celestial Wishing Tree to unlock **advanced transformational abilities**

- **Psychic surgery with light and sound** and the template of the original signature
- Folding the wisdom of **the planes of light and the highest of dimensions** into a client's everyday existence so they can seamlessly execute life's daily activities and the establish true purpose
- A **final celebration of gifts and friends** met along the way, and a healing for the world
